AFTAB ALI

AI/ML Engineer | Python Developer

+92-301-3291634 | aftabali.deve@gmail.com | LinkedIn | Portfolio | Lahore, Pakistan

PROFESSIONAL SUMMARY

AI/ML Engineer and Python developer specializing in Retrieval-Augmented Generation (RAG) systems, LLM integration, and NLP applications. Experienced in designing and deploying end-to-end AI pipelines using LangChain, FastAPI, and vector databases (Pinecone) across multilingual and domain-specific knowledge systems. Delivered production-grade RAG chatbots and citation-backed knowledge assistants that improve information accessibility and reduce manual research time. Combines a strong academic foundation in Information Technology with hands-on freelance and industry traineeship experience in applied AI systems.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C++, C#
- **AI/ML & LLM:** LangChain, LangGraph, RAG Pipelines, OpenAI, Azure OpenAI, Google Gemini, NLP, Scikit-learn, Prompt Engineering
- **Frameworks & Web:** Django, Flask, FastAPI, Streamlit, React, HTML5, CSS3, JavaScript, REST APIs
- **Databases & Vector Stores:** MySQL, PostgreSQL, Oracle, Neo4j, Pinecone, ChromaDB
- **Tools & Platforms:** Git, GitHub, Docker, VS Code, Postman

PROFESSIONAL EXPERIENCE

Freelance AI/ML Developer | *Upwork & Independent International Clients* 2026 – Present

- Design and deliver custom AI and RAG-based solutions for international clients, managing the full lifecycle from requirements gathering and technical scoping to proposal drafting and delivery.

Agentic AI Engineer | *Arbisoft, Lahore* 2 – months

- Built and implemented Agentic AI and RAG based solutions, working with AI agents, LLMs, tool calling, and retrieval workflows to solve real world use cases.

AI Engineer Intern | *A.F. Ferguson & Co. Lahore* 3 – months

- Worked as an AI Intern on AI and RAG based projects, assisting with data preparation, prompt engineering, solution development, and technical documentation.

AI/ML Trainee | *NetSol Technologies, Lahore* 6 – Months

- Completed an intensive traineeship in AI/ML, gaining hands-on experience in machine learning workflows, model development, and production-oriented Python engineering.

KEY PROJECTS

Legal Advisor – RAG-Based Legal Assistant (Final Year Project) | GitHub

Stack: React, Python, LangChain, Neo4j, RAG

- Developed an AI-powered legal guidance platform that compares Pakistani law and Islamic Sharia references side by side for citizens, students, and researchers.
- Implemented citation-backed, context-aware responses that reference source documents to minimize hallucination and increase answer trust.
- Mapped legal domains including constitutional, family, property, criminal, contract, Nikah, inheritance, and Waqf guidance through structured retrieval and graph relationships.

HubeAli – Multilingual Islamic Knowledge Chatbot | Live Project

Stack: Python, LangChain, Pinecone, OpenAI/Gemini

- Engineered a multilingual RAG chatbot processing 500+ Arabic and English religious texts, including classical hadith literature.
- Built a multi-book ingestion pipeline with automatic book metadata detection and batch processing across large text volumes.
- Diagnosed and resolved a cross-lingual retrieval issue by implementing query translation, improving retrieval accuracy for Urdu-language queries against English source documents.

Africa Baze - Telegram-Based Content Platform (Client Project)

Stack: Python, Telegram Bot, RBAC, SQLite, Payment Integration

- Delivered a custom SaaS MVP for a Kenyan client where African creators publish stories, users discover/watch content, and paid content can be monetized through platform workflows.

EDUCATION

Bachelor of Information Technology 2022 – 2026

University of the Punjab (PUCIT/FCIT), Lahore, Pakistan

CERTIFICATIONS & LANGUAGES

- **Certifications:** AI/ML Traineeship, NetSol Technologies. Arbisoft, Master in Data Science (Udemy)
- **Languages:** English (Professional) · Urdu (Native) · Siraiki (Native)
